SUMMARY

Results-driven Information Science graduate with hands-on experience in full-stack web development and Android application development. Proficient in modern web technologies and mobile development, with a strong foundation in data structures, OOPs, and software engineering principles. Seeking an entry-level software development role to apply technical skills and contribute to impactful, scalable solutions.

SKILLS

Languages: Java, Python, C

Concepts: Data Structures, OOPs, DBMS

Web: React.js, HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Android Studio

EXPERIENCE

MindMatrix.io | CL Infotech Pvt. Ltd.

Feb 2026 – May 2026

Android App Development Intern (GenAI)

Bengaluru

- Developed 3+ GenAI-powered Android features using Kotlin and Jetpack Compose, directly enhancing product usability on the MindMatrix Platform.
- Improved app reliability through rigorous testing, debugging, and documentation, reducing reported defects by 20% over the internship period.

Samsung Research

July 2025 – Jan 2026

Full Stack Development Intern

Bengaluru

- Built 5+ responsive front-end modules using React.js and developed RESTful backend services with C# and .NET for an enterprise Workflow Management system.
- Optimized API integration and resolved 15+ front-end bugs, improving application performance and reducing page load time by approximately 30%.

PROJECTS

Reshme – Namma Pride | Kotlin, Firebase, Gemini AI, Jetpack Compose

- Developed a GenAI-powered Android app serving 50+ sericulture farmers, enabling real-time climate monitoring and reducing potential crop loss by up to 40%.
- Integrated Google Gemini AI to generate Kannada-language agricultural guidance, improving accessibility for non-English-speaking users.
- Implemented offline-first architecture using Room DB and Firebase real-time sync, ensuring 100% app availability without internet connectivity.

Document Scanner using OpenCV | Python, OpenCV

- Built a document scanner using Python and OpenCV, achieving 95%+ accuracy in edge detection and perspective transformation across varied lighting conditions.
- Exported processed documents in image and PDF formats, reducing manual digitization time by over 60% compared to traditional methods.

Automated Shopping Cart | RFID, NodeMCU (ESP8266), Arduino IDE

- Built an IoT-based shopping cart system using RFID and NodeMCU, enabling automatic scanning of 100+ products with real-time billing updates.
- Eliminated manual checkout steps entirely, cutting average billing time by 70% through automated item detection and cost calculation.

EDUCATION

Cambridge Institute of Technology

B.E. Information Science | CGPA: 8.45

2022 – 2026

Bengaluru

BGS Gurukula Independent PU College

PUC (PCMB) | 88.16%

2020 – 2022

Bhadravathi

SAV High School

SSLC | 90.54%

2019 – 2020

Bhadravathi

CERTIFICATIONS

- React JS – Simplilearn
- Programming using Java – Infosys Springboard
- Fundamentals of Java Programming – Coursera
- Software Engineering Job Simulation – Forage
