SUMMARY

Looking for an entry-level position in the field of Information Technology (IT), in a company whose values and goals are in conjunction with my own value and skill set. I wish to contribute to a dynamic team of individuals motivated to achieve the company's goal while aiding my personal growth.

SKILLS

Languages: Java, Python, C

Concepts: Data Structures, OOPs, DBMS

Web: React.js, HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Android Studio

EXPERIENCE

MindMatrix.io | CL Infotech Pvt. Ltd.

Feb 2026 – May 2026

Android App Development Intern (GenAI)

Bengaluru

- Currently contributing to Android app development using Generative AI, supporting product feature enhancement through guided tasks and practical modules.
- Gaining hands-on experience in mobile app development, testing, documentation, debugging, and cross-functional collaboration on the MindMatrix Platform.

Samsung Research

July 2025 – Jan 2026

Full Stack Development Intern

Bengaluru

- Worked on a Workflow Management project, developing front-end modules with React.js and building backend services using C# and .NET.
- Gained hands-on experience in full-stack development, API integration, debugging, and optimizing application performance in an enterprise environment.

PROJECTS

Reshme – Namma Pride | Kotlin, Firebase, Gemini AI, Jetpack Compose

- Built a GenAI-powered Android application for sericulture farmers to monitor climate conditions and reduce crop loss through intelligent alerts.
- Integrated Google Gemini AI to deliver multilingual (Kannada) guidance, enabling farmers to access smart recommendations in their native language.
- Implemented offline storage using Room DB, Firebase real-time sync, and Jetpack Compose for a responsive, modern UI.

Document Scanner using OpenCV | Python, OpenCV

- Built a document scanner application using Python and OpenCV to convert physical documents into high-quality digital image/PDF formats.
- Improved document readability using edge detection and perspective transformation techniques.

Automated Shopping Cart | RFID, NodeMCU (ESP8266), Arduino IDE

- Developed an IoT-based automated shopping cart system using RFID and NodeMCU to enable real-time product scanning and dynamic billing updates.
- Reduced manual checkout effort by automating item detection and total cost calculation.

EDUCATION

Cambridge Institute of Technology

2022 – 2026

B.E. Information Science | CGPA: 8.25

Bengaluru

BGS Gurukula Independent PU College

2020 – 2022

PUC (PCMB) | 88.16%

Bhadravathi

SAV High School

2019 – 2020

SSLC | 90.54%

Bhadravathi
